

# LIFE. SAVED.

*"As a healthcare worker, I should have known better than to ignore the signs of a heart attack. The pain started at my fingertips, up my left arm, across my shoulders and down my right arm. I didn't call for help until my entire chest was tight. I was new to the area and hadn't done any research on hospitals, so when first responders recommended Central Florida Regional Hospital because they have the best cardiac unit, I trusted them. My recovery was a team effort and they were there every minute, for my every need." – Lisa, Lake Mary*

---
